- F** = Secure Document Collection and Disposal

- B** = Accepted at Waste Depot, free service;
- C** = Collection Service;
- E** = Accepted at store, free service;

Taking the next step ...

Recycling is only the beginning of reducing waste in the workplace. By looking closer at what you use at work you can create further savings for your business. Why not try...

- Reusing paper in the office
- Printing and photocopying double sided
- Printing draft documents using toner saving modes
- Purchasing goods made with recycled content, e.g. office paper, furniture, re-manufactured printer cartridges
- Use green cleaning products to clean the office, recycled toilet paper, tissues and paper hand towel
